

Website Welcome Letter

Welcome to Columbus Facial Plastics at The Sullivan Centre. We believe that healthy, youthful renewal begins with science. Founded in 1996 by Dr. Michael and Christine Sullivan, our practice was the first of its kind in central Ohio. For 20+ years, The Sullivan Centre has led the way in advancing the science of beauty and providing only the safest and most effective surgical and non-surgical treatments for our patients.

I met Dr. Mike, Dr. Chris and the rest of the team in 2014 and have had the incredible opportunity to train and collaborate with Dr. Mike for the past five years. I officially joined The Sullivan Centre in September 2019 and could not be more excited to lead this exceptional practice into the future.

My goal is to provide you with the education and expertise needed to help you feel confident with your decision to pursue surgical or non-surgical treatment. I am proud to be a part of a highly skilled team that delivers personalized care so that you feel comfortable through every step of the process.

In addition to practicing exclusively in facial plastic and reconstructive surgery, I also serve as the medical director for our non-surgical services. We are fortunate to have two of the most experienced aesthetic providers in central Ohio in their respective fields. Dina Maynard and Nancy Cotterman, RN have been caring for patients at The Sullivan Centre for a combined 25 years! You won't find anyone with more training or skill.

Spend as much time as you need learning more about our team and the services we provide. We are passionate about what we do, and we would love to see you soon.

Dr. Stephen Nogan, M.D.
Facial Plastic & Reconstructive Surgeon
Columbus Facial Plastics at The Sullivan Centre
